Skills

I am a Javascript Engineer that focuses on React, VueJS, Design Systems, and Serverless technologies in Agile and Kanban settings. My passion project is building and operating a Serverless web application called "Bummaries" which allows book readers like me to take and share book notes easily. To grow my skills, I am learning more about Web Accessibility.

Experience

DEC 2021 - PRESENT

Bummaries App – *Side Project*

- Learned the technologies like NextJS, Typescript, Firebase, Redux deeply.
- Learned how to consume APIs by using Open Library API and Cloudinary for image uploads.
- Discovered to quickly pick up newer technologies and finish projects on time.

JAN 2021 - PRESENT

Activity Logger App – *Side Project*

- Learned about backend development.

JAN 2014 - AUG 2016

Indian Army

- Worked in a fast paced environment where I learned how to follow and lead others
- Learned how to work as a team and importance of team culture
- Learned the importance of being disciplined.

Education

NOV 2020 - PRESET

Self Taught Developer

I used many resources like Udemy, Wes Bos, and LinkedIn Learning to learn web development.

DEC 2016 - DEC 2019

Amity University, Delhi – *BA English*
